METROVIS

LARGE OR SMALL, WE CATCH THEM ALL

Metronidazole 100 mg, 250 mg and 750 mg tablets for dogs and cats

Along with you
METROVIS
Metronidazole tablets for dogs and cats

Indications
- Treatment of gastrointestinal tract infections caused by Giardia spp. and Clostridia spp. (i.e. C. perfringens or C. difficile).
- Treatment of infections of the urogenital tract, oral cavity, throat and skin caused by obligate anaerobic bacteria (e.g. Clostridia spp.) susceptible to metronidazole.

Bacterial infections
- Urogenital tract
- Oral cavity
- Throat
- Skin

Gastrointestinal infections
- Treats anaerobic bacterial infections.
- Bactericidal efficacy: kills bacterial microorganisms by disrupting their DNA.

Beneficial for promoting gastrointestinal health and reducing pathogenic bacteria.
Helps restoration of normal microflora.

LIVISTO supports the prudent use of antibiotics
An inappropriate use of antibiotics may increase bacterial resistance and decrease the effectiveness of treatment.

“As little as possible, as much as necessary”
3 strengths to minimise under and overdosing

**Flavoured tablets**
Beef flavour.

**Divisible tablets**
Tablets can be divided into 2 or 4 equal parts.

**Perforated Blister**
For easy administration.

**3 presentations cover all weights**
100 mg, 250 mg and 750 mg.

**Easy tab technology**

**METROVIS** can be given either once or twice daily, giving flexibility which aids with compliance.

**Dosage:** 50 mg/kg body weight once daily, or 25 mg/kg body weight twice daily, for 5-7 days.

METROVIS
Metronidazole 100 mg, 250 mg and 750 mg tablets for dogs and cats

LARGE OR SMALL, WE CATCH THEM ALL

3 PRESENTATIONS COVER ALL WEIGHTS

METROVIS 100 mg, 250 mg and 750 mg tablets.
Metronidazole 100 mg, 250 mg and 750 mg tablets.

Species
Dogs and cats.

Indications
Treatment of gastrointestinal tract infections caused by *Giardia spp.* and *Clostridia spp.* (i.e. *C. perfringens* or *C. difficile*). Treatment of infections of the urogenital tract, oral cavity, throat and skin caused by obligate anaerobic bacteria (e.g. *Clostridia spp.*) susceptible to metronidazole.

Amounts to be administered
For oral administration. The recommended dose is 50 mg metronidazole per kg bodyweight per day, for 5-7 days. The daily dose may be split into two administrations per day (i.e. 25 mg/kg bodyweight twice daily). To ensure administration of the correct dosage, bodyweight should be determined as accurately as possible. Tablets can be divided into 2 or 4 equal parts to ensure accurate dosing. Special precautions to use. The use of this product during pregnancy and lactation is not recommended.

Shelf life
2 years.

Shelf life of divided tablets
3 days.

Storage
Does not require any special storage conditions.
